

**LeClasp Workplace No Jewellery Program -  
Our Solution - Phase 1  
Equipping Workers with the LeClasp Worker Jewellery Holder**

Increasingly **procured** as part of safety equipment and supplies budget (safety glasses, goggles, gloves), our **Workplace No Jewellery Program** assists plant managers and safety coordinators **put into operation** (roll out) **no jewellery policies**, **raising awareness** and **facilitating enforcement on a daily basis** with permanent/temporary workers, young students employees and site visitors (Government inspectors, VIP's, supplier reps.) **at risk of jewellery-related accidents and injuries.**

The program is implemented in **two phases**:

**Phase 1 handles the essentials of the safety initiative --- Equipping employees with the LeClasp Worker Jewellery Holder to attach any-and-all jewellery BEFORE walking in the place of work.**

A simple squeeze on the thumb pads of the [jewellery holder](#) and voila; a worker's **valuable** and **irreplaceable personal, religious and Medical Alert Identification jewellery** are kept **safe, secure** and **protected as one** --- ready for **safekeeping** in a **padlocked location at work** (change room locker, tool box, office desk drawer, car or truck glove box).

If a **secure location is NOT available** at the site, we recommend workers keep jewellery holders at **home**, put away in a place where **every morning** they'll **SEE** the **Safety First Message** (bathroom cabinet, dresser, kitchen cupboard); a **reminder** to remove wedding or engagement rings, bracelets, necklaces and body piercing **BEFORE departing for work.**

The jewellery holders stored at home can be used by the whole family when cleaning the garage, back yard, mowing the grass, exercising (contact sports, swimming, softball, soccer), etc.

More importantly, workers now have a neat "**portable jewellery box**" to attach jewellery.

**And can no longer make excuses for NOT removing the jewellery.**

**The LeClasp™ Jewelry Holders are available decorated with your choice of Jewellery-Related Safety First Branded message prominently displayed on the Front Side.**

● **Recommended Safety First message for:**

- **Permanent, temporary workers, new and young employees, seasonally hires:** Safety First - Remove and attached your jewellery here!
- **Guests, VIP's, Government Inspectors and suppliers touring the site:** Safety First - Visitors Jewellery Holder (make for a great gift to visitors)
- **Summertime student hires -** Safety First - Student Jewellery Holder (Handout during orientation week)
- **Optionally the Back Side** of the LeClasp™ Jewelry Holders can be **decorated** with organization logo and safety slogan, emergency telephone number, commemorative crest, etc.

The LeClasp™ Workers Jewellery Holders start at **\$7.19**. Add **\$1.50** for back side logo. [more](#)
